

Massachusetts Department of Public Health

Arbovirus Surveillance Program Report

Key Public Risk Communication Messages for This Week:

MDPH reported six EEE positive mosquito samples on 7/3/24 in Plymouth County. Risk levels in the region have been elevated. MDPH also reported two WNV mosquito samples on 7/2/24 from Norfolk County. Personal protection measures are recommended due early season arbovirus detections and above average mosquito vector populations across the state.

Check your risk levels throughout the season by visiting our interactive site <https://www.mass.gov/info-details/massachusetts-arbovirus-update>

Intense regional precipitation events and warm weather will support increased populations of WNV and EEE mosquito vectors. Avoid mosquito bites by using EPA approved repellents, appropriate clothing and avoiding peak mosquito activity between dusk and dawn. Remove standing water by emptying containers and tarps.

Please review the 2024 MDPH Surveillance and Response Plan for updates to risk levels and risk messaging. <https://www.mass.gov/doc/2024-arbovirus-surveillance-and-response-plan/download>

WNV and EEE Virus Surveillance Summary	
Results contained in this report reflect data up to and inclusive of MMWR Week 27 (Sunday, 06/30/2024-Saturday, 07/06/2024)	
Mosquito Surveillance	
Number of Mosquito Samples Tested	1720
Number of WNV Positive Samples	2
Number of EEE Positive Samples	6
Equine/Mammal Surveillance	
Number of Mammal Specimens Tested	0
Number of WNV Positive Horses	0
Number of EEE Positive Horses	0
Number of other WNV Positive Mammals	0
Human Surveillance	
Number of Human Specimens Tested	0
Number of Human WNV Cases	0
Number of Human EEE Cases	0
