## Arbovirus Surveillance Program Report

### Key Public Risk Communication Messages for This Week:

MDPH reported nine EEE positive mosquito samples in 2024, from Plymouth County. Risk levels in the region are elevated. MDPH also reported 16 WNV mosquito samples in 2024. Personal protection measures are recommended due early season arbovirus detections and above average mosquito vector populations across the state.

Check your risk levels throughout the season by visiting our interactive site <https://www.mass.gov/info-details/massachusetts-arbovirus-update>

Intense regional precipitation events and warm weather will support populations of WNV and EEE mosquito vectors. Avoid mosquito bites by using EPA approved repellents, appropriate clothing and avoiding peak mosquito activity between dusk and dawn. Remove standing water by emptying containers and tarps.

Please review the 2024 MDPH Surveillance and Response Plan for updates to risk levels and risk messaging. <https://www.mass.gov/doc/2024-arbovirus-surveillance-and-response-plan/download>

<b>WNV and EEE Virus Surveillance Summary</b>	
Results contained in this report reflect data up to and inclusive of MMWR Week 29 (Sunday, 07/14/2024-Saturday, 07/20/2024)	
<b>Mosquito Surveillance</b>	
Number of Mosquito Samples Tested	3257
Number of WNV Positive Samples	16
Number of EEE Positive Samples	9
<b>Equine/Mammal Surveillance</b>	
Number of Mammal Specimens Tested	2
Number of WNV Positive Horses	0
Number of EEE Positive Horses	0
Number of other WNV Positive Mammals	0
<b>Human Surveillance</b>	
Number of Human Specimens Tested	34
Number of Human WNV Cases	0
Number of Human EEE Cases	0
