

Massachusetts Department of Public Health Arbovirus Surveillance Program Report

Key Public Risk Communication Messages for This Week:

MDPH has identified three EEE human cases in Middlesex, Plymouth, and Worcester Counties, two EEE horse cases in Plymouth County, and 91 EEE positive mosquito samples, from Barnstable, Bristol, Essex, Middlesex, Norfolk, Plymouth, and Worcester Counties. MDPH has also identified seven WNV human cases from Hampden and Middlesex, Norfolk, and Suffolk Counties, and 301 WNV mosquito samples collected statewide.

Aerial spraying to control EEE mosquito vectors in Plymouth County and ground spraying in Worcester County was completed on 8/31/24. For more information and a list of impacted communities, please visit <https://www.mass.gov/info-details/mosquito-control-and-spraying>

Completed aerial and ground spray maps are available are posted here: [In response to recent arbovirus detections, risk levels have been elevated in adjacent communities. Personal protection measures are recommended due to elevated arbovirus detections and average mosquito vector populations across the state. Check your risk levels throughout the season by visiting our interactive site <https://www.mass.gov/info-details/massachusetts-arbovirus-update>](https://massnrc.org/spray-map/Region>List</p></div><div data-bbox=)

Average regional precipitation events and above average daytime weather will continue to support populations of WNV and EEE mosquito vectors. Avoid mosquito bites by using EPA approved repellents, appropriate clothing and avoiding peak mosquito activity between dusk and dawn. Remove standing water by emptying containers and tarps. Please review the 2024 MDPH Surveillance and Response Plan for updates to risk levels and risk messaging. <https://www.mass.gov/doc/2024-arbovirus-surveillance-and-response-plan/download>

WNV and EEE Virus Surveillance Summary Results contained in this report reflect data up to and inclusive of MMWR Week 36 (Sunday, 09/01/2024-Saturday, 09/07/2024)	
Mosquito Surveillance	
Number of Mosquito Samples Tested	7622
Number of WNV Positive Samples	301
Number of EEE Positive Samples	91
Equine/Mammal Surveillance	
Number of Mammal Specimens Tested	8
Number of WNV Positive Horses	0
Number of EEE Positive Horses	2
Number of other WNV Positive Mammals	0
Human Surveillance	
Number of Human Specimens Tested	141
Number of Human WNV Cases	7
Number of Human EEE Cases	3
